HERBICIDE ADVISORY

− This hay was grown in a field treated with ____________________, a US EPA registered herbicide that controls broadleaf weeds in grass hay.

− Any herbicide residue on this hay poses no risk to the health of your animals and has been harvested in accordance with harvest interval guidelines established by the US EPA.

− Manure produced after feeding hay grown in a field treated with ____________________ should only be applied to rangeland, pastures, grasses grown for seed, wheat and corn.

− Hay from areas treated with ____________________ should only be spread on rangeland, pastures, grasses grown for seed, wheat and corn.

− Do not spread this hay or the manure produced after feeding this hay to any broadleaf crop or to gardens.

− Do not produce compost with this hay or the manure produced after feeding this hay.

− Consult the label for complete details of use precautions and restrictions. You can access the label for this herbicide by visiting http://www.cdms.net/LabelsMsds/LMDefault.aspx and searching for this product.

− Provide this information to anyone buying, accepting or using this hay or the manure produced after feeding this hay.
